Empty fields can be due to values for chosen system do not exist or cannot be calculated. Window U-values calculated in accordance with EN ISO 10077-1 and EN ISO 10077-2. The given U-values are valid for elements without ventilation.

Energy data:

N/A: Values not available or cannot be calculated

Area: Area window/element

Uw: U-value of the element

Ff: Area glass/area window

gg: Share of solar energy reaching into the building

LTg: Light transmission. Measure of sun light reaching into the building

System: Quoted window system

Class: N/A

EW: N/A

Variations in glass coatings between different suppliers can give marginal deviations in U-, g- and LT-values from the values detailed in the order confirmation.

All VELFAC products are FSC® certified with the exception of flush doors, VELFAC IN, elements with timber fillings and accessories. FSC-mix 70%. FSC® NC-COC-012338
